Reference: Receipt of Xyntha 500IU Lot N20360/

Dear Canadian Blood Services and customers,

This memo is issued to confirm that Xyntha 500IU Lot « N20360» and «N20360/» are equivalent.

Following a visual inspection of the entire lot of Xyntha 500IU Lot « **N20360**» by our manufacturing site it was necessary to re-package all units of the vial lot « **N20360**» with a new carton and shipper box. To maintain traceability of the operations, it was necessary to add a slash at the end of the lot number «**N20360/**».

The inspection and addition of the slash does not affect the safety or potency of the product.

Kind regards,

A handwritten signature in blue ink, appearing to read "Lynda Quesnel", written over a horizontal line.

Lynda Quesnel
Manager, AQO
